

GREENLINE  
— YACHTS —

# IT IS NOT JUST ABOUT THE DESTINATION, IT IS ABOUT THE JOURNEY

“A human life is a journey and I believe we should make it a spectacular one”

Vladimir Zinchenko

SVP Yachts owner and CEO

Greenline provides the only complete fleet available with alternative or conventional propulsion systems and highly specialized boat designs to ensure an unrivalled responsible boating experience.

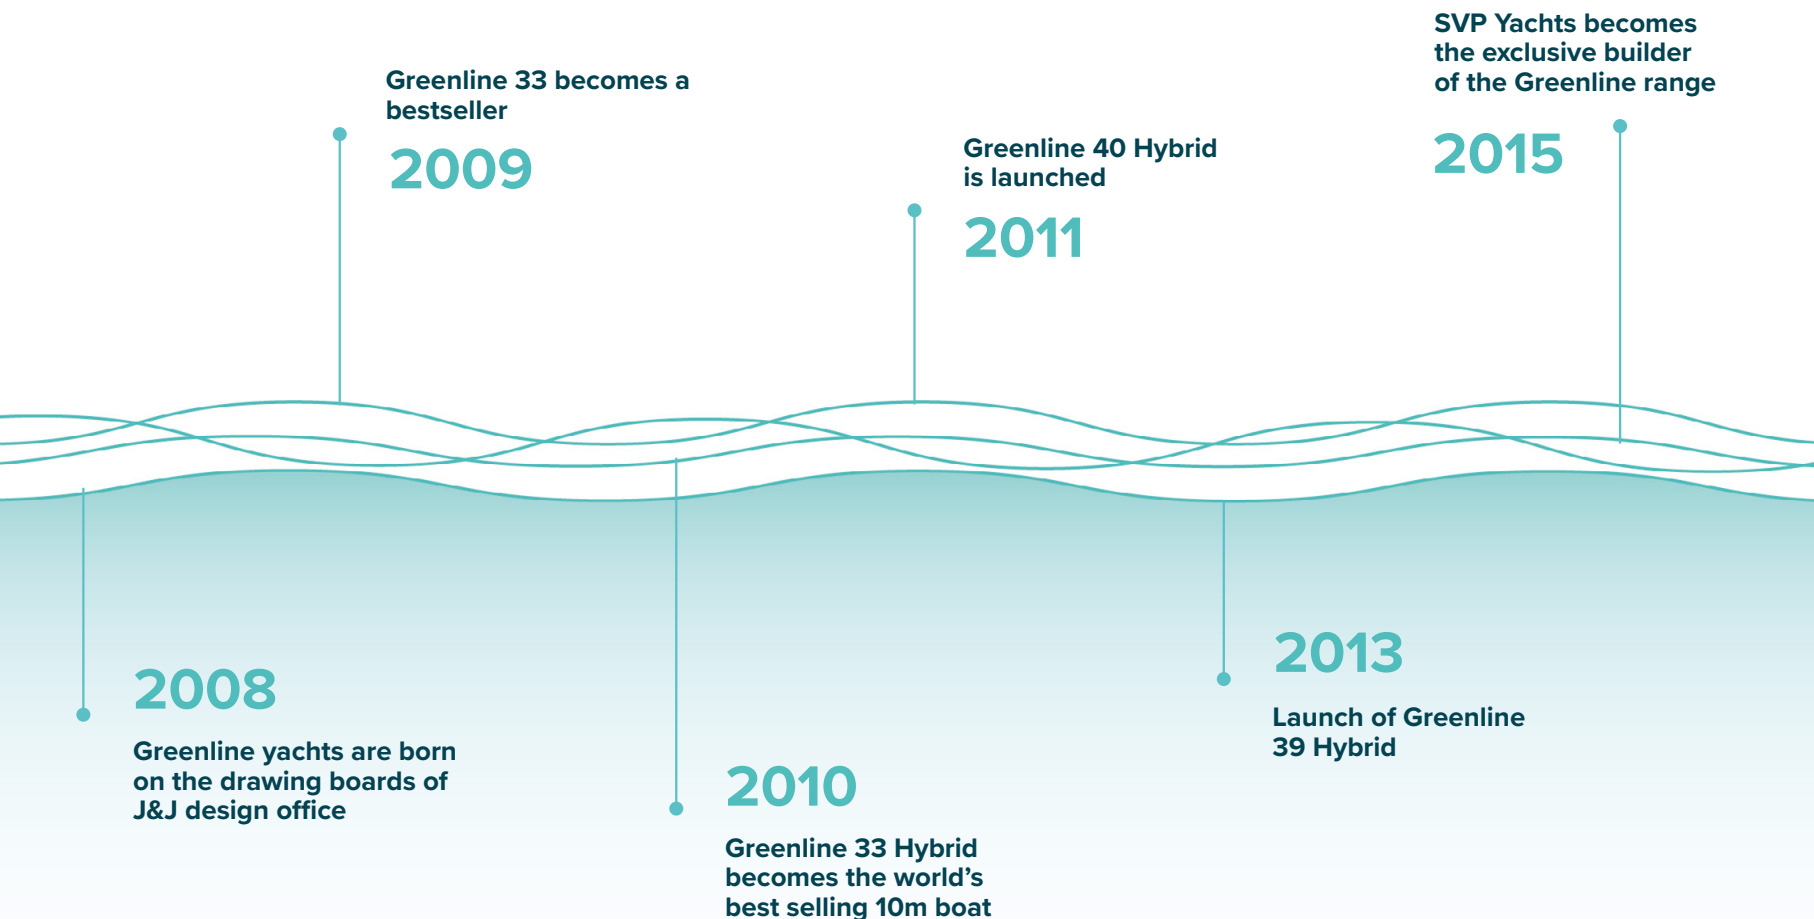

# We keep on shaping the future

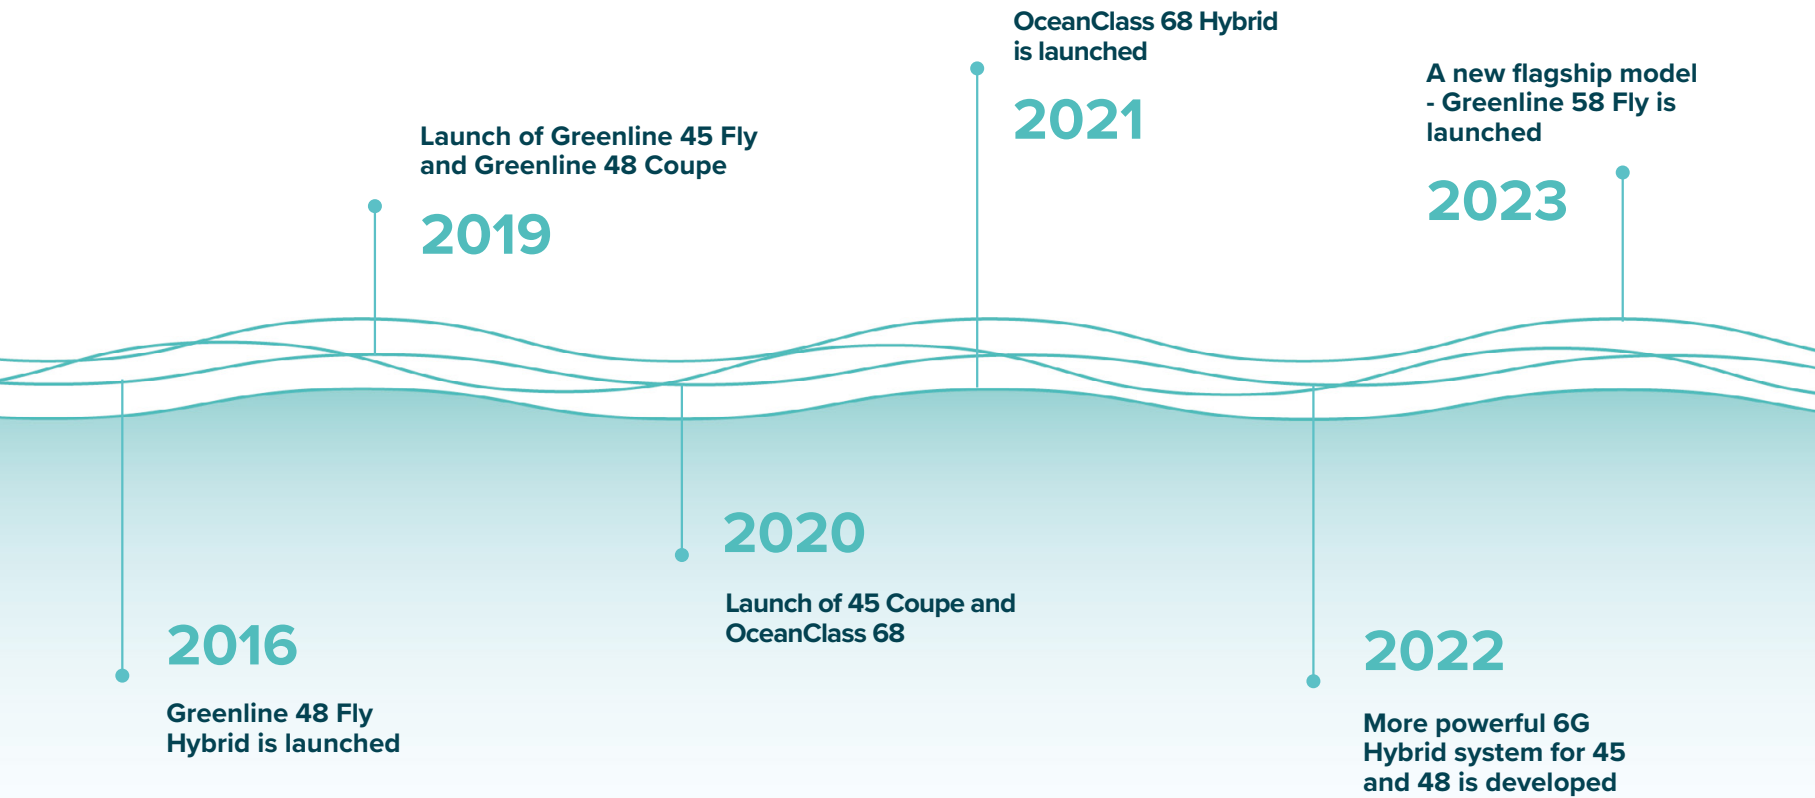

## SOMEWHERE, BEYOND THE SEA

"WE BELIEVE MODERN BOATERS ARE READY FOR THE NEXT STEP IN THE EVOLUTION OF LEISURE BOATING AND ARE BECOMING INCREASINGLY MORE AWARE THAT WE ARE THE ONLY ONES THAT CAN PRESERVE THE ENVIRONMENT FOR OUR CHILDREN AND GRANDCHILDREN TO ENJOY".

Vladimir Zinchenko,  
SVP Yachts owner and CEO

# Preserving the environment without sacrificing your comfort

ON OUR WAY TO FULLY RESPONSIBLE BOATING

Our customers want to immerse themselves in the natural world and preserve it at the same time. They want special moments with friends and family on the water but value ecological responsibility and a low impact on the environment. With our range of hybrid and fully electric boats, we allow them to do that.

Greenline Yachts are the only range of Yachts to offer H-Drive as well as full E-Drive

Renewable sources of energy with solar panels

All Yachts built-in vacuum infusion technology

We're using innovative eco-friendly fabrics such as PET foam core, grass paper and recycled materials

Organic boat wash and biodegradable garbage bags delivered with every new Greenline

Dedicated recycling garbage boxes

Merchandise strictly from recycled or sustainable materials

Fully recycled carpentry leftovers reused as heating pallets

Inhouse 3D printing for small parts to reduce transport

# The world's first green country

GREENLINE YACHTS ARE BUILT IN SLOVENIA, A COUNTRY PRAISED FOR ITS  
INTACT NATURE AND SUSTAINABLE MINDSET OF ITS INHABITANTS

Made in Slovenia, EU  
member since 2004

Rich heritage of  
nautical expertise.

I FEEL  
SLOVENIA

World's first certified  
green destination

# From the project to the launch

THE CONCEPT. THE TECHNOLOGIES. THE HANDCRAFTED TOUCH.

## It starts with a sketch

Ideas are born in minds, but it is on paper or more often, on a computer, where they have to prove their plausibility to then truly come to life. Our team of engineers and designers meticulously study every detail in order to ensure the best possible outcome: a safe, comfortable and elegant boat.

## Infusion Technology

Greenline Yachts have adopted vacuum infusion technology since its inception. Compared to traditional hand lay-up, there are several benefits such as optimal amount of resin used in the process resulting in optimal weight and stiffness, higher quality of materials used (osmosis proof vinyl ester resin) as well as being environmentally friendlier.

## Tooling and prototyping

The highly sophisticated tooling forms the basis for a very efficient and streamlined production process - arguably one of the most advanced worldwide.

## Handcrafted

Tradition and experience means a great deal in boat building. Greenline Yachts are built by some of the most skilled and experienced craftsmen, based on centuries of local boatbuilding tradition and over half a century of composite boatbuilding experience.

## High level customization

At the Greenline shipyard, the doors are always open for our customers. Before and during the purchase process, they come to select the materials, test the electronics and personally follow the building process of their boat.

## Custom made

From hull colour to furniture wood and upholstery, the future Greenline boat owners can customize their vessels according to their personal preferences. While wide array of materials is already on display in our showroom in Begunje, the fulfilment of special requirements can also be arranged.

**Did you know that all Greenline boats are tested on water before the delivery?**

Tests are carried out on Greenline's own pontoon in Marina Portorož in Slovenia, where the final preparations and hand-overs are organized too.

# Extreme Comfort & Maximum Convenience

FOR YOUR CONTINUED WELL-BEING ON BOARD

Maintaining the highest levels of comfort and convenience both on and below deck is of utmost importance across the Greenline range. The boats are stylish but our designs are always created with safety and practicality as priorities. On board storage is excellent and ease of movement around the boat is a key consideration for our design team. With the majority of heavy components mounted in the deepest part of the hull, Greenline naturally has a low centre of gravity, making them less susceptible to rolling and more stable out at sea, whether stationary or on passage.

## Low center of gravity: stability, safety & comfort

We pride ourselves in having one of the most comfortable and safest ranges of boats available on the market. The Greenline concept puts comfort and convenience at the top of our priority list.

On the majority of Greenline models there is not a single step between the bathing platform and the helmsman's position. This is truly unique on a high-volume yacht and ensures a very low center of gravity, which means stability, safety and more comfort at sea.

Optimal position of the center of gravity is of the utmost importance for a vessel's stability.

## Less energy required to move through the water

**THE HYBRID HULL** has evolved from the Greenline signature hull design called Superdisplacement, which incorporates some of the properties of a modern sailing boat hull in that it moves through the water with the least amount of drag and exceeds the theoretical speed of the hull, which is determined by the length of the waterline.

The Hybrid hull is a natural evolution of the Superdisplacement as it enables cruising at higher speeds while still maintaining optimal consumption and stability at lower cruising speeds.

The Hybrid hull allows **FOR SMOOTH AND STABLE CRUISING AT 10, 12, 16, 20, 25 KNOTS**. This way the owner can choose from the range of engines offered - the power of the engines determines the cruising speed without compromising on the safety, stability or consumption levels of your Greenline.

### HYBRID HULL DESIGN

The fuel consumption per nautical mile is much lower than that of a comparable displacement hull and as little as one quarter of a semi-displacement, twin engine planing boat.

This revolutionary hull efficiently covers the speed range from zero to over double displacement speed - up to 18 knots in case of a 10 meter waterline and up to 25 knots in case of a 12 meter waterline.

With twin stabilizers on the Greenline 33 and 40, it has unrivalled anti-roll and tracking stability. It offers a comfortable and safe ride in all weather conditions, whether faced by a head-on, side or following sea.

#### BENEFITS

- Extremely comfortable and safe ride
- Low fuel consumption and carbon footprint
- Outstanding seaworthiness and stability
- Low running costs

# Your choice for responsible boating

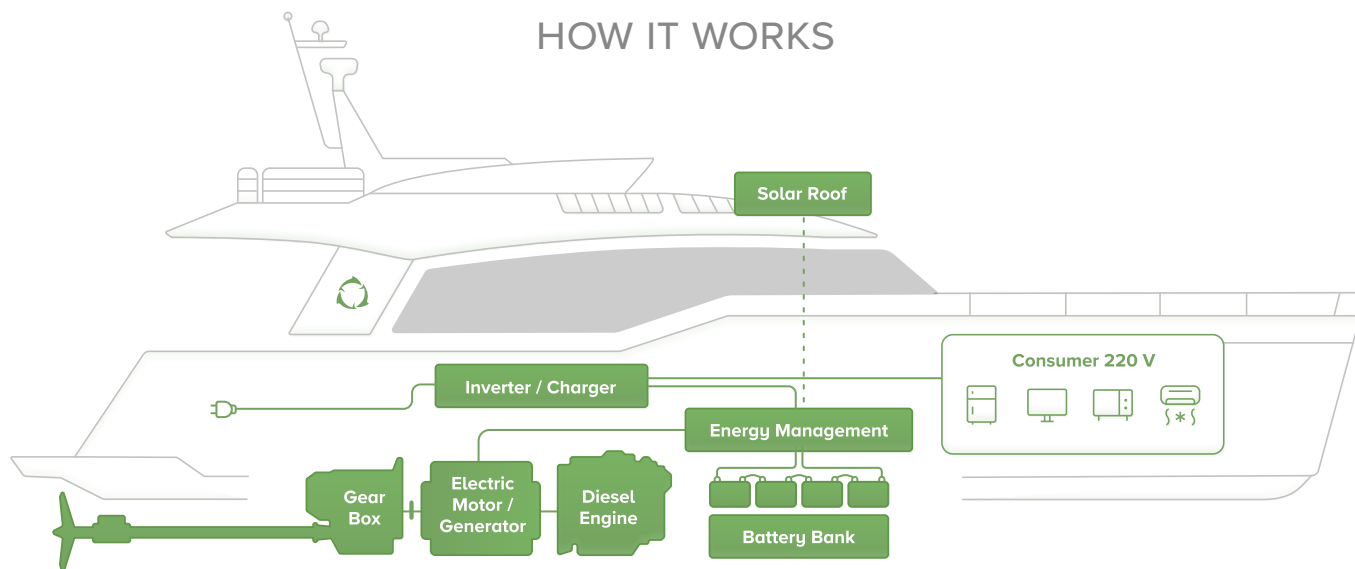

## H-Drive system

The hybrid system was launched in 2009 with Greenline 33 as the first production boat available with the Hybrid drive.

With constant technological development, we now have the 3<sup>RD</sup> generation of the H-Drive available.

Apart from the convenience of having 230V AC available at all times, the advantage of the H-Drive is also silent and emission-less navigation, which the boating community now calls “gentleman’s boating”. Why? Because only the Greenline Hybrid allows you to sail without disturbing your neighbours at the anchorage or in the marina. The Hybrid drive allows for cruising for up to 20 nautical miles at approx. 4-5 knots on a full charge, which is more than enough for a typical leisure day on the water.

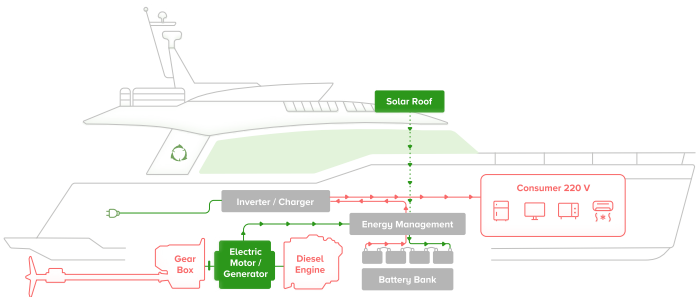

The protected H-Drive connects the 4 modes of operation with full integration and simplicity. A control system simplifies the interface to the user via a single (Diesel/Electric) switch.

### BENEFITS

- Low maintenance
- Ease of use
- Use of electric energy for propulsion: the running cost of electric boating is 10 times lower than burning diesel fuel
  - Smoke, noise and vibration eliminated
- 230/120V AC power system at any time, either at the dock or at sea

# CHARGING AND DRIVING MODES (GREENLINE 48 FLY EXAMPLE)

## DIESEL MODE

The diesel engine propels the boat and drives the generator, which recharges the battery pack. A full charge takes only 2-2.5 hours on diesel mode.

### up to 24 Knots

Top speed 24 Knots in diesel mode\*

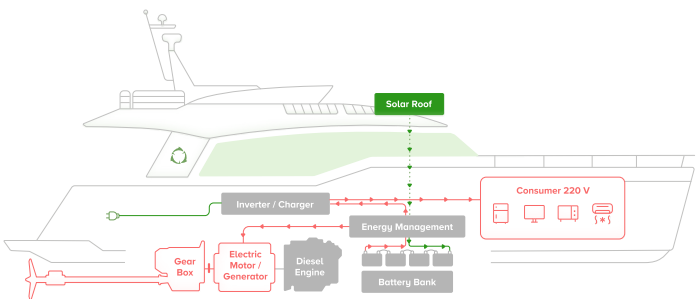

### Twin 370 Hp

2 x 370 Hp Yanmar diesel engines

### Twin 14 kW

2 x 14 kW generator

## HYBRID MODE

In the electric drive mode the boat propulsion is provided by the electric motor using the power from the Lithium battery. This zero- emission mode is used to sail in and out of a marina or anchorage with no noise, no smoke and an insignificant wake..

### Twin 25 kW

2 x 25 kW Electric Motor

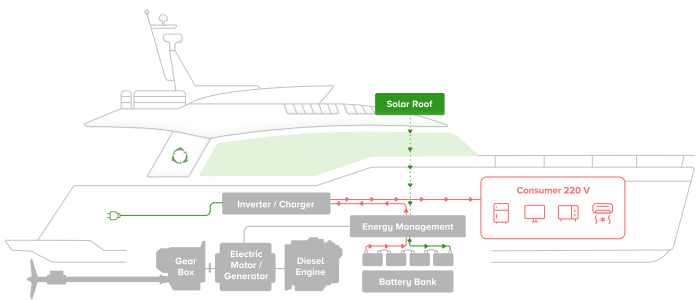

### Range 25 NM

Range at 5 knots in electric mode\*

### 7.5 Knots

Top speed 7.5 knots in electric mode\*

## AT ANCHOR

The solar roof array charges the batteries, which provide AC power supply for the appliances via an inverter. If the level of battery charge drops below a set value, the diesel engine should be switched on in order to drive the generator and charge the battery pack via generator(s). The propeller is disengaged (the gearbox is in neutral).

### Up to 1.98 kW

660 W Standard, additional 1.32 kW on hard-top

### Up to 80 kW/h

Up to 6 x 13.3 LiPo batteries

● charging ● consuming ● passive state

\* Maximum speeds will vary depending on cleanliness of hull, condition of stern gear, craft load, water and air temperatures, sea conditions and other factors. Speed and range estimates are therefore given in good faith but without any warranty or liability on the part of SVP Yachts. For more information and detailed standard specifications please contact your local dealer.

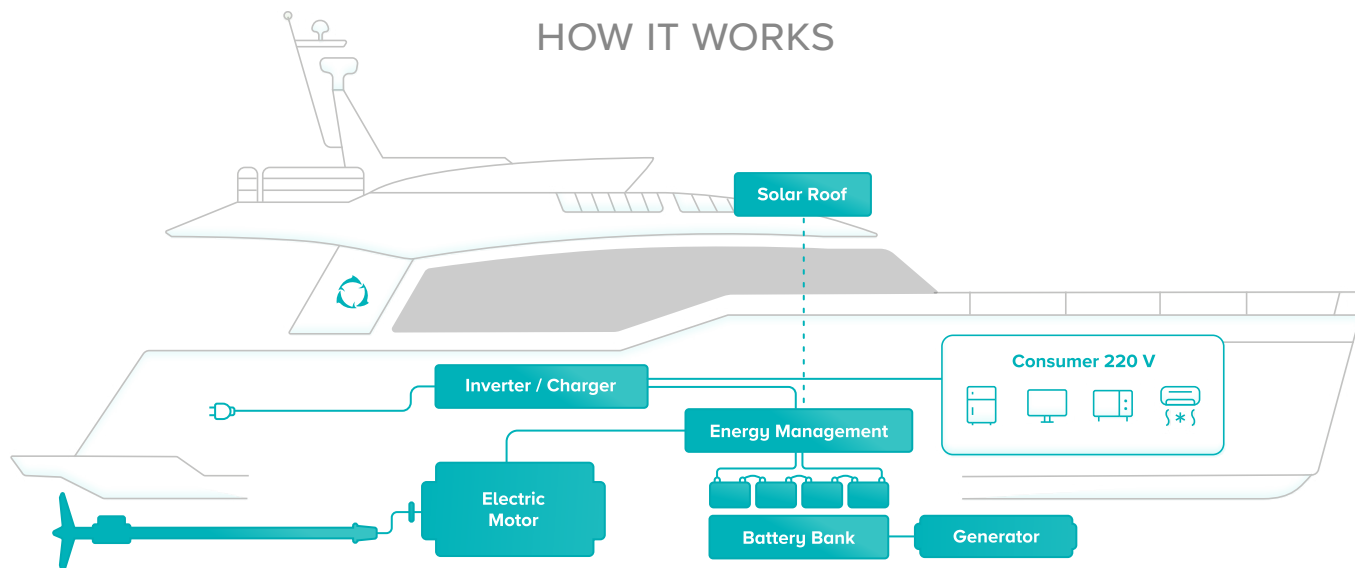

# No need for wind to cruise in silence

## E-Drive System

Electric drive is the next logical step in the evolution and development of the Greenline Yachts range of environmentally friendly yachts. Solar panels charge the service batteries to run all appliances with constant 230/120V AC power while the main engine battery is charged by shore power with charging time as short as 4 hours for a full charge.

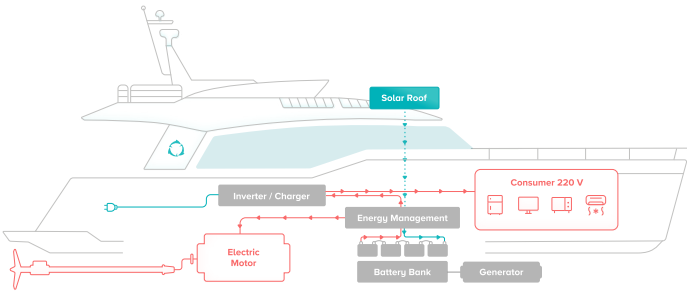

The E-drive mode makes your cruising silent and enjoyable while being responsible towards the environment and friendly to your pocket.

- Silent navigation
- Longer range
- Environmentally friendly boating

# CHARGING AND DRIVING MODES (GREENLINE 48 FLY EXAMPLE)

## DEFAULT ELECTRIC MODE

In the electric drive mode the boat propulsion is provided by the electric motor using the power from the Lithium battery.

### 11 Knots

Top speed 11 knots in electric mode\*

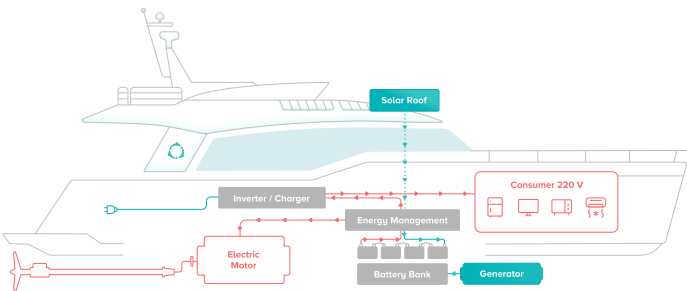

### Up to 30 NM

Range at 7 knots in electric mode\*

### Twin 100 kW

2 x 100 kW Electric Motor

## RANGE EXTENDER OPTION

To cover longer distances of 100 nm and more, an optional range extender can be installed. This diesel generator can charge the battery while driving in electric mode.

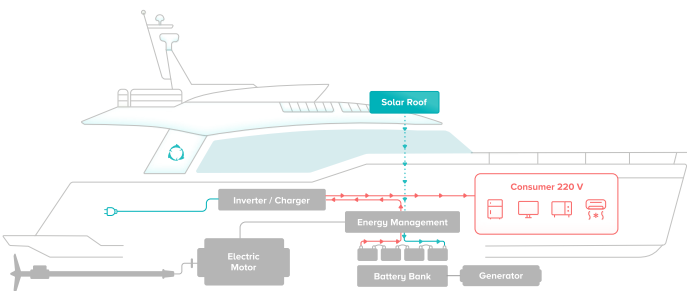

### 20/40 kW

Range extender / Diesel generator

### > 100 NM

Range at 5 knots in electric mode\*

## AT ANCHOR

The solar roof array charges the batteries, which provide AC power supply for the appliances via an inverter.

### Up to 1.98 kW

660 W Standard, additional 1.32 kW on hard-top

### 160 kW/h

4 x 40 kW/h lithium high performance batteries

● charging ● consuming ● passive state

\* Maximum speeds will vary depending on cleanliness of hull, condition of stern gear, craft load, water and air temperatures, sea conditions and other factors. Speed and range estimates are therefore given in good faith but without any warranty or liability on the part of SVP Yachts. For more information and detailed standard specifications please contact your local dealer.

# Solar and Batteries

Every Greenline has solar panels and AC power onboard at all times as standard with the upgrade of additional solar panels on the T-top available on the new Greenline 45 Fly and the Greenline 48 Fly. A Coupe version of the 45 Coupe is following the same philosophy as the rest of Greenline range with providing 2.97 kW (45 Coupe) of solar power to its consumers.

## Solar roof

Regardless of whether you choose the H-Drive system or a standard diesel drive, your Greenline can collect and store power from the sun, utilizing highly efficient solar panels on the hardtop thereby producing plenty of electricity to power all systems including home appliances with 230V or 120V AC power to make your living onboard as pleasant and convenient as possible.

The Photo-Voltaic (PV) panels on the hardtop keep the batteries fully charged and provide additional energy for the boat's H-Drive or E-Drive system.

6 PV panels with forced air cooling deliver up to 1.98 kW per hour of electric power in daylight conditions.

As a result, they are capable of supplying constant power to on-board 230V or 120V consumers such as refrigerator, air conditioning and entertainment systems, thus removing the need for a generator or shore power.

## Lithium batteries

Lithium batteries have been around for a while, powering your smartphones, laptop computers and other gadgets that represent a large part of our lives today. With the wider adoption of electric vehicles in recent years technology has progressed, and we are proud of the fact that starting in 2009 Greenline Yachts has been pioneering the use of Lithium Polymer batteries for heavier consumers such as electric propulsion for vessel navigating.

Greenline Yachts utilize for the H-Drive system the best lithium (Li-Po) battery technology available: up to 26 kW/h on Greenline 39, up to 53.2 kW/h on Greenline 40, up to 80kW/h on Greenline 45 & 48 and up to 80 kW/h on Greenline 58.

For the standard onboard service, we equip our boats with LiFePO4-technology based batteries.

Very powerful, lightweight (7 times lighter, 1/3 of normal battery size) and maintenance-free, these batteries are the ultimate for your hybrid boat with a life expectancy of over 10 years.

### BENEFITS

- Green energy production
- Cost and emission-free sailing
- No maintenance

### BENEFITS

- No maintenance
- Ease of use
- More time spent out on the water, whether cruising or at anchor
- Estimated 10 years life expectancy
- Lightweight and compact

# A weekend at anchor on a Greenline without the use of energy

230V AC POWER ONBOARD ALL THE TIME

Greenline Yachts offer a unique set of benefits that no other boat on the market can offer today. You will never find yourself opening a warm bottle of wine or having to serve your friends cocktails without ice. Greenline Yachts offer 230V AC power onboard at all times even without being plugged in at the marina or running a generator. 230V AC is available as standard, even without the H-Drive option!

**AC CONSUMERS  
OPERATING  
WITHOUT A  
GENERATOR**

AVAILABLE ON

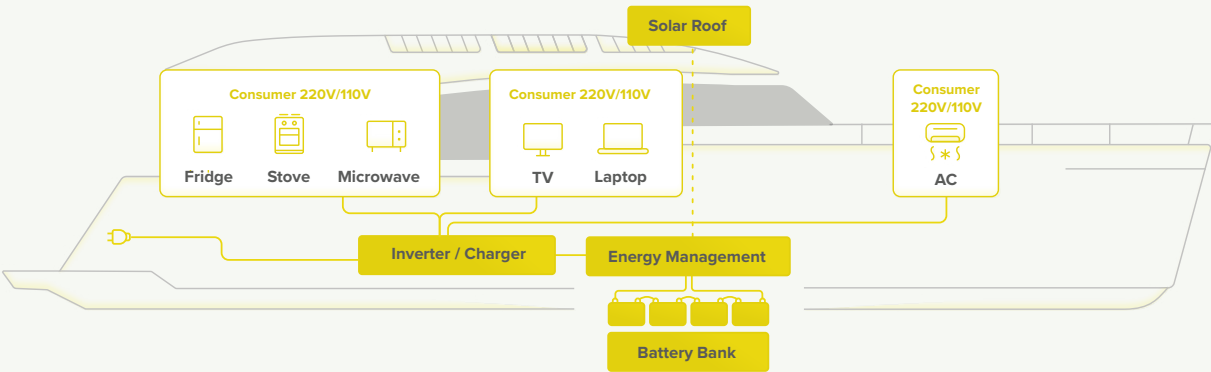

## CONSUMPTION CONTROL SYSTEM

Complete control and monitoring of consumed energy and charging of the batteries from various sources such as alternators, solar panels or generators is available on your smartphone or tablet using mobile application via WiFi connectivity.

# SOLAR BENEFITS FOR HYBRID (GREENLINE 48 COUPE EXAMPLE)

Our aim is to provide comfort on board like no other. With a bank of solar panels you can use all of the boat's appliances, whether cruising or at rest, without having to fire up a generator or connect to shore power. This means there is no noise, no vibrations, no emissions and no disturbing your neighbours when the boat is on anchor. By utilising high performance LiFePO4 batteries, even high load appliances like air-conditioning can be run in silence.

### Up to 80 kW/h

Hi-performance LiPo  
Batteries up to 6 x  
13.3 kWh

### 26 kW/h per day

Approx. consumption  
for 4 people in 24h  
**incl. air conditioning  
use\***

### 13.3 kW/h per day

2.64 kW standard  
solar panels\*

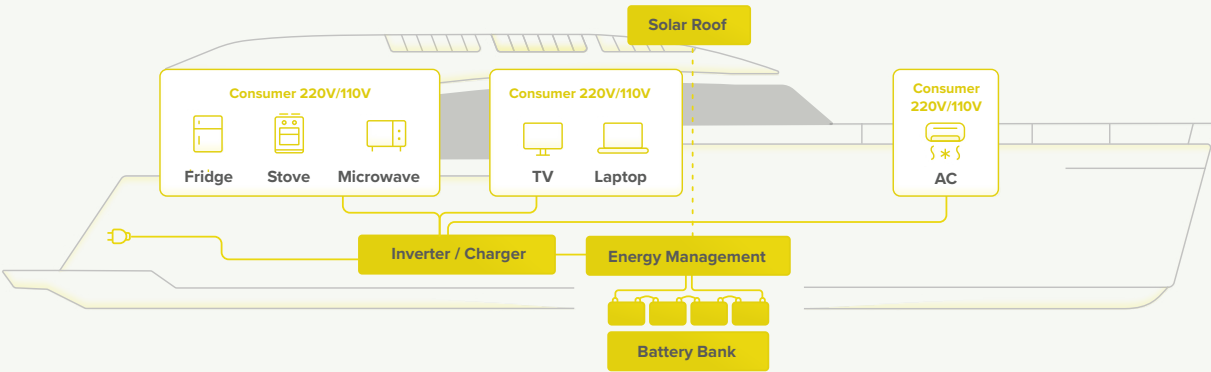

### 4 days on anchor

Depending on your  
energy management  
and the sunshine, this  
period can be longer  
or shorter

# SOLAR BENEFITS FOR NON-HYBRID (GREENLINE 48 COUPE EXAMPLE)

Even without the hybrid drive system, there are huge benefits from Greenline's standard fit solar panels. The panels are constantly creating sustainable energy and feeding the domestic battery bank so onboard lighting and refrigeration, for example, can be run silently without having to rely on a diesel generator. This harnessing of solar power brings both peace of mind and a responsible way to create energy on board.

### Up to 10.25 kW/h

Standard LiFePo4  
batteries 4.1 kW/h

### 6.5 kWh/day

Approx. consumption  
for 4 people in 24h  
excl. air conditioning  
use\*

### 13.3 kW/h per day

2.64 kW standard  
solar panels\*

### 365 days on anchor

Depending on your  
energy management  
and the sunshine, this  
period can be longer  
or shorter.

\* Approximate consumption values can slightly vary depending on the frequency of the appliance utilizations. Approximate consumption values are therefore given in good faith but without any warranty or liability on the part of SVP Yachts. For more information and detailed standard specifications please contact your local dealer.

# A journey on Greenline 45 Coupe

To illustrate the ideal application of the hybrid system, we present you with a real-world example featuring a short journey aboard the 45 Coupe. Note that the consumption figures include not only marina maneuvers but also the use of onboard home appliances, air condition in smart mode... We considered this scenario on sunny days with calculations including solar kickback.

## 1. Undocking

In the early morning, the Greenline 45 Coupe yacht smoothly left the dock using its electric motor. After a quick fuel top-up at the fuel station, it continued its journey from the marina. The battery state 1-2 nm off shore marina is at approx 82 %.

Time	1 hour
Avg. speed	2.5 kts
Consumption	10 kW

## 2. Switch to diesel mode

The 20nm journey from Palma to Andratx takes about one hour at an average speed of 20 kts. **In Diesel mode the electric motor turns into a generator and charges with impressive 28 kW the LiPo batteries. After 15 minutes, the battery is already back at 100%.**

Time	1 hour
Avg. speed	20 kts
Consumption	100 l/h

## 3. Weekend stay on anchor

On this example we anchor in the bay for 48 hours. All of the home appliances including the air condition in smart mode are running of the LiPo battery. Including the electric manouvering in the bay the battery is at approx 10 % - 48h later.

Time	48 hours
Avg. speed	2.5 kts
Consumption	70 kW

## 4. Switch to diesel mode

Departing Andratx towards Ibiza, the Greenline 45 Coupe cruises to Ibiza using its efficient diesel engine. **The electric motor turns again into a generator and charges with impressive 28 kW the LiPo batteries.** After the two hour ride we arrive wiht 100% battery.

Time	2 hour
Avg. speed	20 kts
Consumption	100 l/h

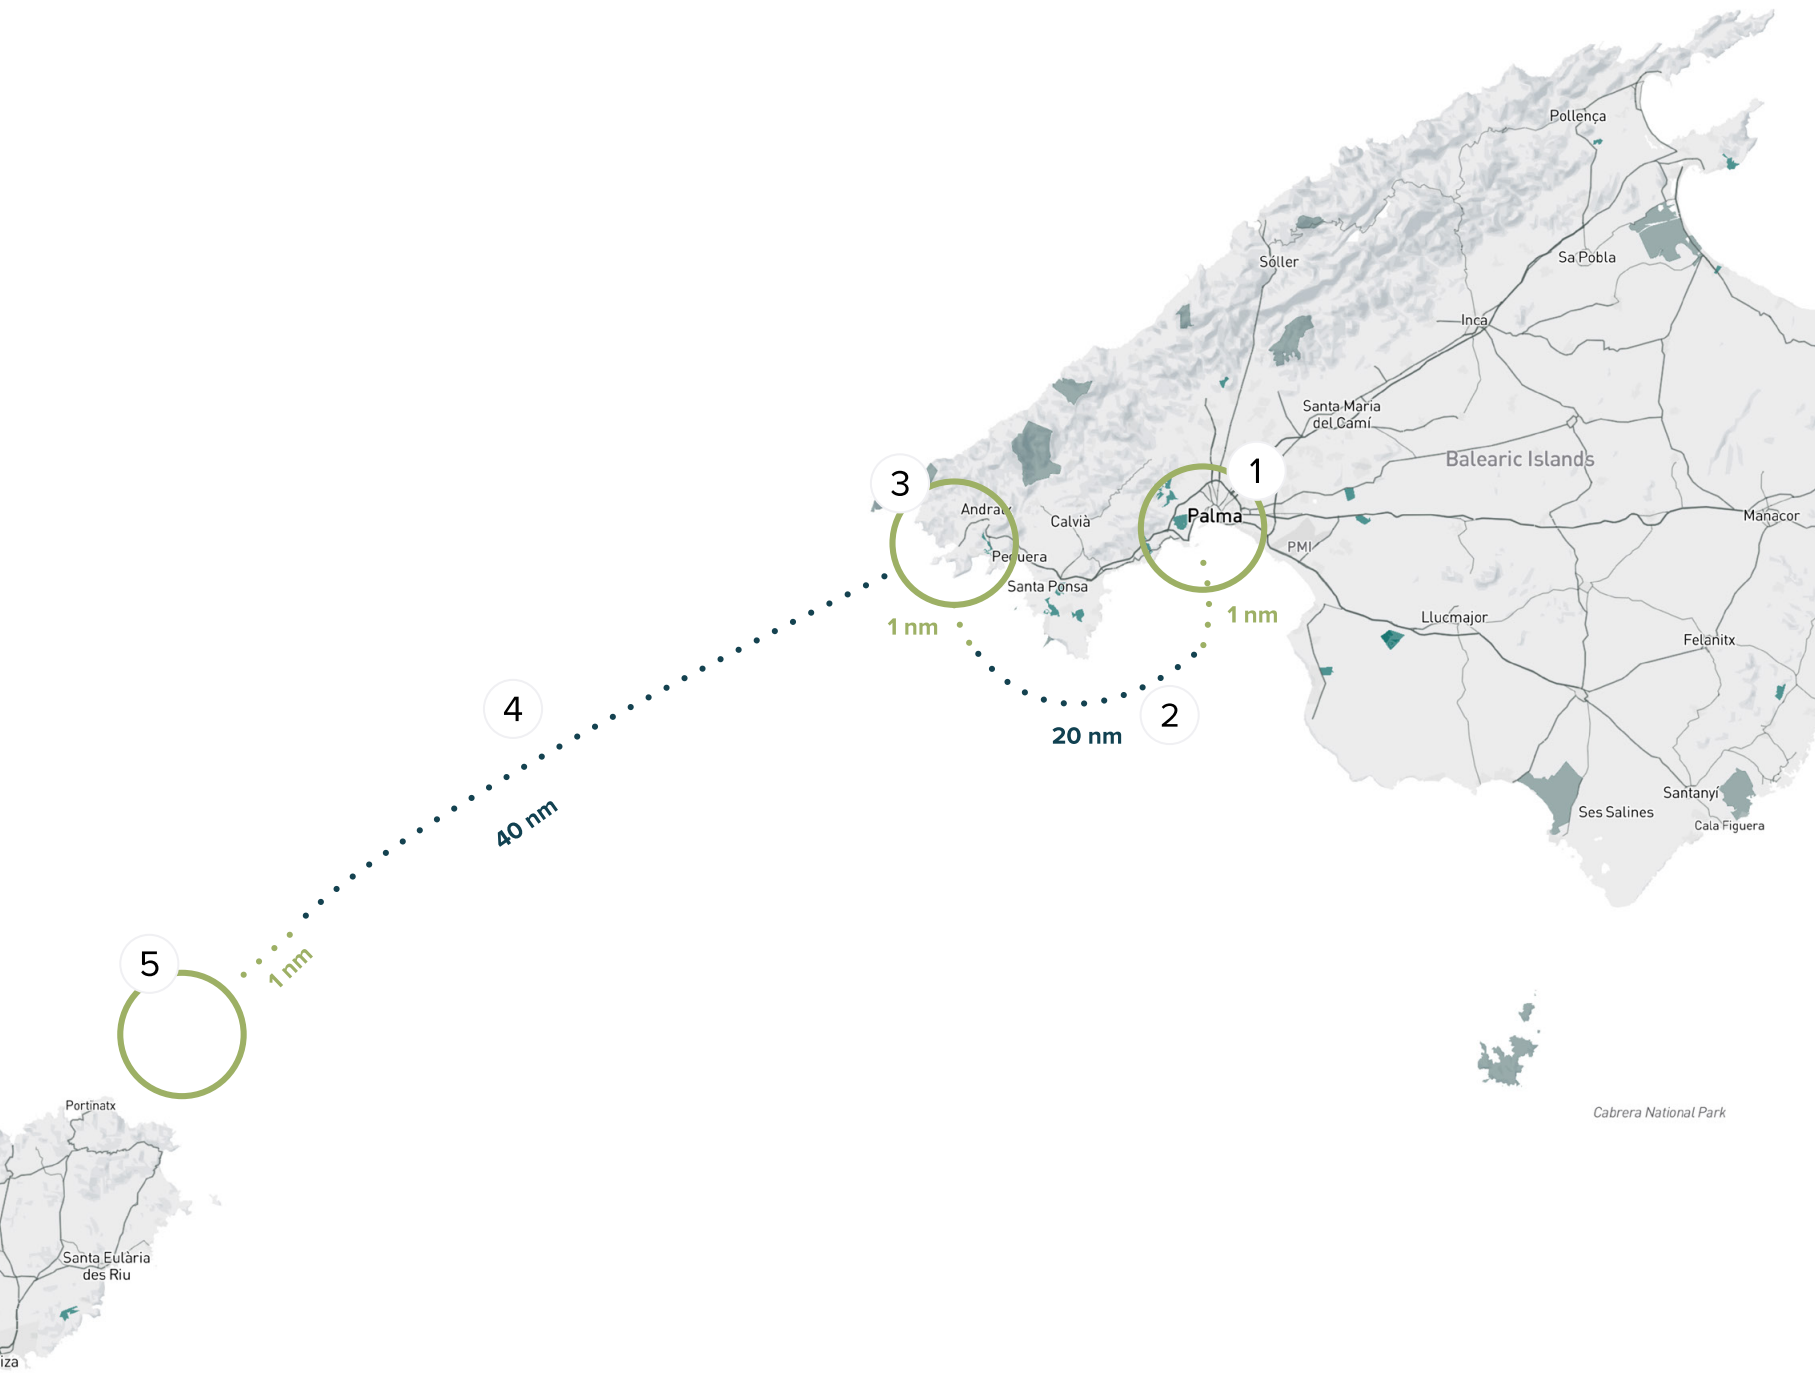

## 5. Ibiza stay

Approaching beautiful Ibiza, we switch into electric mode. The silence of the electric engine makes the entry into the bay seamless and noise-free. The Greenline 45 Coupe stays in the north of Ibiza for 48 hours. All of the home appliances, including the air conditioning in smart mode, run off a battery. After the 48 hours, the battery is at 10%.

Time	48 hours
Avg. speed	2.5 kts
Consumption	70 kW

IT'S TIME TO CHOOSE  
THE ONE TO CRUISE WITH  
TO YOUR NEXT DESTINATION

# Greenline 39

*Discover a new sense of freedom*

Aft camera available

Stepping on board of the Greenline 39 you cannot help but be amazed by the feeling of space. The key elements of Greenline design are all there - the 360° panoramic view in the salon, the aft galley, electric fold-down transom and the spacious layout which all come together to create one of the most sociable and relaxing boats on the market today.

Step on board the Greenline 39 and discover a new sense of freedom.

360° panoramic  
view from the salon

Open galley

Opening bathing platform

Adaptive owner's cabin

Bathroom with a separate shower accessible from owner's cabin and salon

Superb guest cabin

Comfortable  
sunbathing area

Greenline 39 is all about sophistication in design, technology, production and environment. Thanks to dedicated engineers and designers, as well as experienced craftsmen skilled at latest technologies in boat building Greenline 39 has become one of the most popular boats in a short time.

Greenline 39 design profited from feedback of hundreds of users from all over the world. We improved every single point, from boarding the boat to hydrodynamics, from seaworthiness with low consumption to more speed and stability.

# Greenline 48 Coupe

*Discover what being independent truly means*

**In yachting this means not being dependent on marinas, water supplies and mostly electricity. The ability to stay at anchor as long as you like.**

The 48 Coupe is equipped with staggering 2,64 kW solar panels on the roof as standard, which is equal to a small generator output. Having continuous power onboard to run all the appliances in silence, without using any fossil fuels, not only is much friendlier to the environment, but also significantly increases the quality of living onboard.

Open galley

Solar panels  
as standard

360° panoramic view  
in the salon

Adaptive owner's cabin

Lower deck offers a 3 ensuite cabin layout with the master cabin in the bow and two cabins with twin berths aft. Not including the captain's quarters, accessible from the cockpit, of course.

# Greenline 48 Fly

*Discover a new level of comfort*

Traditional side anchor or optional bow anchor

**The flagship of the Greenline family, the Greenline 48 offers a host of innovative features to set her apart from the competition.**

Designed for long-range cruising, with a new interior design, 3<sup>rd</sup> Generation Hybrid system, luxurious flybridge, hydraulic platform, utility compartment and much more, the Greenline 48 is designed to go the distance.

Hydraulic bathing platform

Comfortable sunbathing area

Open galley

Flybridge with U-shaped settee and sun lounge

Wetbar with barbecue, icemaker and fridge

360° panoramic view  
in the salon

Wider and larger  
owner's cabin

Two luxurious en-suite  
guest cabins

Separate owner's toilet  
and shower

Independence in terms of not having to search for marinas to plug in and rather stay at anchor as long as you like. The 48 Fly is equipped with 1.8 kW of solar panels on the roof and the optional Hard-Top, which is almost like a small generator running all the time. Having continuous and almost unlimited amount of power onboard to run all the onboard appliances in silence, without using any fossil fuels, is not only much friendlier to the environment, but also significantly increases the quality of living onboard.

# Greenline 58 Coupe

*A new model in the making*

H

HYBRID  
DRIVE

Brand new hybrid system with powerful  
twin 25kW electric motors that can be  
adapted to any diesel engine

Comfortable sunbathing area | Easy accessible anchor   

One-level living: The yacht is designed without a single step between the cockpit and the helmsman position.

Cruising on the success of the Greenline 58 Fly, Greenline Yachts is excited to present its latest marvel, the Greenline 58 Coupe. Set to make waves in Summer 2025, this yacht is the perfect companion to the 58 Fly, sharing its luxurious features and design philosophy, but with a significant enhancement in sustainability—an advanced solar power system.

The 58 Coupe showcases an impeccable design with pristine lines and balanced proportions that maintain the Greenline hallmark of a gratifying onboard experience. The innovative solar power system is not merely functional but also elegantly incorporated into the yacht's aesthetic, providing a sleek and forward-thinking appeal.

The single-level main deck design is retained from the 58 Fly, where the aft galley unites the saloon and cockpit into a grand space for living and hosting. Notably, the solar enhancements grant guests the indulgence of sun-drenched leisure—whether it's lounging on the stern bench or the aft sunbathing area—without compromising the vessel's performance or comfort.

16 solar panels | 7 kW of solar power | Boat's in-house operations to operate silently without the use of a loud diesel generator.

Waterside living area: aft-facing transom bench & extended hydraulic bathing platform

*Enjoy comfort - aboard the Greenline 58 Coupe*

Flexible waterside living area:  
A comfortable outside dining table for 6

Flexible waterside living area:  
A spacious daybed

Flexible waterside living area:  
An entertaining space for 8.

*Holiday or work retreat?  
The decision is in your hands.*

A roomy and brilliantly lit living room enhances the joy of residing on board.

Experience comfortable remote work with the authentic features of a home-based office.

The main cabin extends over the full width of the boat at midship and offers a generous 1.96 meters of headroom everywhere.

Choose a layout with 2 or 3 comfortable bathrooms.

Comfortable sunbathing area I Flybridge with U-shaped  
settee and sun lounge I Easy accessible anchor

One-level living: The yacht is designed without a single step between the cockpit and the helmsman position.

In light of the success of the 45 Fly, Greenline Yachts is delighted to reveal the latest addition to its revolutionary range of flybridge cruisers, the 58 Fly. Launching in Autumn 2022, the all-new 58 Fly fits into the range to bridge the gap between the popular 48 Fly and flagship 68 OceanClass.

The model shows a fresh exterior look with clean lines and tight proportions retaining the focus on elements that make a Greenline such a pleasurable boat to live aboard. The single-level main deck with aft galley ensures the saloon and cockpit combine to create a large living and entertaining area and the cut-outs in the forward bulwarks align to deliver spectacular views over the water from the lower deck.

*Discover the sound of silence*

## TEST CENTER PORTOROŽ

Portorož Marina is where we test out and launch all of our yachts. Most of our Greenline models are available to test all year round.

When visiting this specific test center you are only an hour away from our shipyard, where we invite our valued customers to see for themselves how our yachts are made.

## LAMPERTHEIM, GERMANY

The above mentioned Central EU test center is not only perfectly located logistically, but it is also amazing for those who want to experience the German countryside! Go on a German Wine Tour or visit the Heidelberg Castle while you come on your Greenline Yacht experience tour.

## FORT LAUDERDALE, FLORIDA

Visit our test centre in the 'Sunshine State' of Florida. Fort Lauderdale is famed for its beaches and boating canals. Choose any boat of your desire. Here, you can pick and mix from our full fleet and choose between traditional and alternative propulsion.
